

Bently Nevada Remote Monitoring & Diagnostics

Ready to support you during restricted work or travel

Operating production plants continues to be essential to meet the ongoing energy demand, despite restricted work and travel

Our RM&D experts stand ready to monitor and assess the health of both your machinery and system & instrumentation assets *with regional and global coverage.*

Both scheduled and reactive/call-off services are available. Exception reports are issued for abnormalities or concerns, with detailed observations and recommendations.

What we offer:

- ✓ Machinery Health Audits
- ✓ System optimization & troubleshooting
- ✓ Server health audits
- ✓ Baseline & Exception reporting
- ✓ Periodic customer review calls and on-call support
- ✓ Remote Support for corrective actions (e.g., in situ balancing)
- ✓ Alarm & Event Management
- ✓ Online portal case management
- ✓ Secure connectivity which accommodates your IT requirements
- ✓ Options for RM&D coverage in-country, regionally, and/or globally

Secure, Flexible Connectivity Options:

- System1 Remote Monitoring
- Archive Data Review
- Remote System1 Hosting
- Remote ADRE/Scout Connection

Bently Nevada, a Baker Hughes business is ready to support you, giving you the peace of mind to know that your assets are closely monitored at this critical time, and helping you to keep your machinery and plant available.
