

Position Statement on Chemical Management

Purpose

Baker Hughes is committed to responsible chemical management. Our internal policies and procedures are designed to minimizing risk in how we develop, manage, and distribute chemicals across our operations. We focus on minimizing risk by complying with quality, safety, environmental standards. Chemical Management includes, but is not limited to, handling, transferring, storage, transporting, blending, inventory control, proper disposal of waste, emergency preparedness, notification and reporting and regulatory compliance.

We provide training on Chemical Management to employees and contractors who have the potential to work with chemicals. Personnel are trained on the requirements of Chemical Management Procedure and their responsibilities within their role. Personnel are trained on the general chemical hazards in the workplace, prevention, safety and emergency preparedness.
